Section 1004's Audit Exchange Program

This is a reminder of our Section's Audit Exchange Program which provides mutual benefits to our members and to local companies. The companies get no-charge quality systems audits which may serve to assess readiness for ISO registration, or simply as an adjunct to an existing internal audit program. The auditors get documented auditing experience which may be useful for enhancing their skills or for maintaining auditor certifications. So there is something for everyone. We instituted this as a pilot program last year; we have performed one such audit to date, and have another scheduled for

November. If you are interested in participating in such audits, either as an auditor, or as a company to be audited, or would like additional information, please let me know.
